Professional Summary

Full-stack JavaScript developer (React.js, Node.js, Express.js) with production experience building and modernizing enterprise web applications, including an HRMS platform used by HR teams and employees. Proven ability to migrate legacy codebases into modern, RESTful architectures and ship clean, responsive interfaces end-to-end. Strong foundation across relational and NoSQL databases (PostgreSQL, MongoDB, MySQL), with a track record of independently delivering full projects from design to deployment.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, C++, PHP, HTML5, CSS3/SASS
- **Frontend:** React.js, Angular, Bootstrap, Tailwind CSS, Ant Design, shadcn/ui, XML
- **Backend & Databases:** Node.js, Express.js, Prisma ORM, PostgreSQL, MongoDB, Mongoose ORM, MySQL, Firebase
- **Tools & DevOps:** Git, GitHub, VS Code, Vercel, Netlify, Postman
- **Practices:** Agile/Scrum, RESTful API Design, Code Review, Unit Testing, Cross-Functional Collaboration
- **Design & Productivity:** Figma, WordPress, Adobe Photoshop, Adobe InDesign, Canva, Microsoft Word, Excel
- **Languages Spoken:** English, Malayalam

Work Experience

Software Developer

Sep 2025 – Present

Docme Cloud Solutions

- Collaborated with cross-functional product and HR teams to design and ship new features for Loyaltri, a full-scale HRMS and employee engagement platform serving 5000+ users, improving usability for HR administrators and employees.
- Built and maintained 10+ responsive frontend pages in React.js, tightening component structure and cutting UI inconsistencies to improve page load performance by roughly 20%.
- Led the modernization of the internal Loyaltri Support Tool, migrating a legacy codebase to a React.js and Node.js stack and reducing long-standing technical debt.
- Re-engineered core support-tool functionality into a RESTful API using Node.js and Express.js, redesigning the interface and cutting manual support turnaround time by 10%.
- Participated in Agile sprint planning and peer code reviews, maintaining consistent code quality and on-time feature delivery across releases.

Projects

Eclipse Pay – Full-Stack Payment System

Jan 2024 – Mar 2024

Academic Project

- Designed and built a secure payment processing system handling 20+ simulated transactions, implementing validation and error-handling to streamline the payment flow.
- Built end-to-end using React.js, Node.js, Express.js, and MongoDB, with a RESTful API layer connecting frontend and backend.

Library Management / File Upload System

Sep 2024 – Oct 2024

Freelance Project

- Built an integrated educational application allowing 100+ students to upload, organize, and access textbooks through a centralized library system.
- Developed the backend with Node.js, Express.js, and MongoDB, and delivered the project independently from requirements gathering to deployment for a freelance client.

Education

Bachelor of Computer Application

Oct 2021 – Apr 2024

Sree Narayana College of Technology, Kerala University

Higher Secondary (State Syllabus)

Jun 2020 – Mar 2021

AKMHSS

High School (State Syllabus)

Jun 2018 – Mar 2019

TKMHSS

Interests

Football, Coding, Automobiles, Gaming
